PASSATO/PROSSIMO *Giant*

PRESENTAZIONE

La gamma Passato Prossimo si arricchisce di una nuova serie di colori frutto della costante ricerca liberamente ispirata all'antica tecnica del Seminato .

Nasce così la serie Passato Prossimo Giant, un prodotto dal forte impatto visivo e di carattere, in grado di valorizzare tutti gli ambienti della casa.

Oltre al già affermato **40x40x1,2 cm** è disponibile il nuovo formato **60x60x2 cm** con finitura lucida, semilucida (matt) oppure anticata. Top, scale e complementi sono disponibili a richiesta per tutta la gamma Passato Prossimo.

(A richiesta è sempre disponibile la finitura prelevigata da lucidare dopo la posa e spessore secondo necessità compreso tra 12 e 30mm)

LA COSTANTE

PRESENTATION

La gamme Passato Prossimo s'enrichit d'une nouvelle série de couleurs, fruit d'une recherche inspirée de l'ancienne technique de Seminato.

La série Passato Prossimo Giant est née, un produit avec un fort impact visuel et caractère, capable d'améliorer tous les environnements.

De plus, le nouveau format 60x60x2 cm est ajouté, en plus de 40x40x1.2 en finition polie, semi polie (mate) ou antique.

(Sur demande, il est également possible de fournir des carreaux à polir après pose par l'artisan d'une épaisseur comprise entre 12 et 30 mm)

PRESENTATION

INFORMAZIONI TECNICHE

Le piastrelle della serie Passato Prossimo sono ottenute dalla ricomposizione di prodotti naturali quali micrograniglia di marmi italiani, polvere di marmo, ossidi coloranti e cemento bianco.

Pertanto i pavimenti in graniglia, per caratteristiche meccaniche, di assorbimento, resistenza agli agenti chimici sono del tutto paragonabili ai marmi e pietre naturali.

Per tutto ciò che concerne la posa, i trattamenti e manutenzione far riferimento alle nostro fascicolo "Informazioni tecniche".

The tiles of the Passato Prossimo series are made up of natural products: micro-grit of Italian marble, marble dust, coloring oxides and white cement.

Therefore our floors regarding mechanical characteristics, resistance to chemical agents and absorption are completely comparable to marble and natural stone.

For installation advice, treatments and maintenance, refer to our "Technical information" booklet.
